### **WISCONSIN CHILDHOOD COMMUNICABLE DISEASES**

Most childhood illnesses do not require exclusion. Caregiver/teacher should determine if the illness 1) prevents child from participating comfortably in activities, 2) results in need for care that is greater than staff can provide without compromising health and safety of other children or 3) poses risk of spread. If any of these criteria are met, child should be excluded regardless of the type of illness.

### **Communicable Diseases Wisconsin Department of Health**

Communicable diseases, also known as infectious diseases or transmissible diseases, are illnesses that result from the infection, presence and growth of pathogenic (capable of causing disease) biologic agents in an individual human or other animal host. Infections may range in severity from asymptomatic (without symptoms) to severe and fatal. The term infection does not have the same meaning as infectious disease because some infections do not cause illness in a host.
